

Dhiaeddine Zouaghi

Software Engineer · .NET · Angular · Azure

+49 179 156 1500 | zouaghi.dhiaeddine@gmail.com | [LinkedIn](#) | [GitHub](#) | Hamburg, Germany

PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience in enterprise .NET and Angular development. Track record spanning API design, frontend migrations, CI/CD pipelines, and cloud performance work on Azure. Microsoft-certified Azure Developer (AZ-204). Currently building a portfolio application end-to-end with .NET 8, React, Docker, and Kubernetes to deepen cloud-native skills independently. Based in Hamburg, open to opportunities in English or French.

TECHNICAL SKILLS

Languages: C#, TypeScript, Python, JavaScript

Frameworks & Libraries: .NET Framework, .NET Core / .NET 6–8, Angular, React (learning), Entity Framework, WCF

Cloud & DevOps: Azure (Functions, Blob Storage, Logic Apps, Application Insights), Azure DevOps, Docker, CI/CD (YAML & Classic pipelines), Kubernetes (learning)

Databases: MS SQL Server, MongoDB

Testing & Tools: xUnit, Postman, SoapUI, Application Insights / KQL, Git, GitHub, TFS, Jira, Confluence, Redgate, Visual Studio, VS Code

Practices: Clean Architecture, SOLID Principles, RESTful API Design, Agile/Scrum, Code Review, Technical Documentation

EXPERIENCE

CED Tunisia

Oct. 2022 – Mar. 2026

Software Engineer, Full-Stack (.NET / Angular)

Tunis, Tunisia

- Delivered and maintained modular RESTful APIs in .NET 6 consumed across 6 Angular projects, reducing cross-service coupling and improving frontend delivery speed.
- Led solo migration of 5 Angular 4 applications to Angular 13+ and contributed to a 6th as part of a team, modernizing the frontend stack and eliminating legacy framework debt.
- Investigated critical CPU spikes (20–90%+ on individual APIs) using Application Insights and KQL, identified root causes, and collaborated with the infrastructure engineer on targeted upscaling, recovering normal service levels and unblocking 1,000+ stalled invoice records.
- Extended existing Classic Editor CI/CD pipelines and co-built new YAML pipelines with reusable templates from scratch alongside the DevOps engineer, improving release consistency across environments.
- Identified a documentation gap in the team, introduced Mermaid diagrams and Markdown-based API documentation as a practice, trained colleagues on Copilot-assisted doc generation, and built an automated wiki publishing pipeline via a dedicated branch, taking the team from zero documentation to a self-maintaining knowledge base.
- Diagnosed and resolved production incidents through structured log analysis and observability tooling, reducing recurring investigation time.
- Mentored junior developers and supervised interns through regular code reviews, holding standards in API design, unit testing, and version control.

CED Tunisia

Feb. 2022 – Jul. 2022

Graduate Intern, Full-Stack & Data Science

Tunis, Tunisia

- Built a Python machine learning model for automated invoice categorization, achieving 90% classification accuracy on the validation set.
- Developed .NET 6 APIs for invoice storage and retrieval backed by Azure Blob Storage and SQL Server.
- Delivered an Angular 14 dashboard with Microsoft Graph API integration for classifying emails and documents, including architecture diagrams and onboarding documentation.

Millenia Engineering

Jun. 2021 – Aug. 2021

Software Engineering Intern, Backend & Data Systems

Bizerte, Tunisia

- Implemented a Node.js telemetry service decoding industrial signals from Modbus analyzers.
- Designed MongoDB schemas for efficient time-series data storage and retrieval.

PROJECTS

Personal Portfolio Application | .NET 8, React, Docker, Azure, Kubernetes

In Progress

- Architected and built a fullstack application from scratch following Clean Architecture principles (Domain, Application, Infrastructure, Presentation layers).
- Implemented JWT authentication, per-IP rate limiting, Serilog structured logging to a dedicated SQL Server log database, and SendGrid email integration.
- Containerizing with Docker and deploying to Azure Kubernetes Service with CI/CD via GitHub Actions and Azure Container Registry.
- Full stack: .NET 8, React, TypeScript, SQL Server, Entity Framework Core, Docker, Kubernetes, Azure, GitHub Actions, Serilog, SendGrid, JWT.

CERTIFICATIONS & ACHIEVEMENTS

AZ-204: Microsoft Azure Developer Associate

Aug. 2024

TOEIC: Professional English Proficiency

Score: 975/990, Apr. 2022

EDUCATION

National School of Computer Science (ENSI)

Manouba, Tunisia

Computer Science Engineering Degree, one of Tunisia’s top engineering schools

Sept. 2019 – Sept. 2022

Preparatory Institute for Engineering Studies of Bizerte (IPEIB)

Bizerte, Tunisia

Physics & Chemistry for Engineering, ranked 123rd among 1,000+ national participants

Sept. 2017 – Sept. 2019

LANGUAGES

Arabic: Native

English: Fluent

French: Fluent

German: Beginner (actively learning)
