PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience building enterprise-grade .NET backend services and Angular applications. Skilled in RESTful APIs, CI/CD, Azure cloud development, frontend migrations, and technical mentorship. Microsoft Certified Azure Developer (AZ-204). Built and deployed a full-stack portfolio application using .NET 10, React, TypeScript, PostgreSQL, Docker, and Azure with Clean Architecture and GitHub Actions CI/CD.

TECHNICAL SKILLS

Programming Languages: C#, TypeScript, Python, JavaScript

Frameworks & Libraries: .NET Framework, .NET Core / .NET 8+, ASP.NET Core, Angular, React, Entity Framework Core, WCF

Cloud Platforms: Microsoft Azure, Azure Functions, Azure Blob Storage, Azure Logic Apps, Azure App Service, Azure Application Insights, Azure Service Bus

DevOps & CI/CD: Azure DevOps, GitHub Actions, Docker, Kubernetes, GitHub Container Registry, YAML Pipelines, SonarQube, TFS

Databases: Microsoft SQL Server, PostgreSQL, MongoDB, Entity Framework Core, Code-First Migrations

Testing: xUnit, Unit Testing, Integration Testing, Postman, SoapUI

Tools: Git, GitHub, Visual Studio, VS Code, Jira, Confluence, Redgate, Application Insights, KQL

Architecture & Practices: Clean Architecture, Onion Architecture, SOLID Principles, RESTful API Design, Microservices, Agile, Scrum, Code Review, Technical Documentation

WORK EXPERIENCE

CED Tunisia

October 2022 – March 2026

Software Engineer – Full-Stack .NET / Angular

Tunis, Tunisia

- Designed and delivered modular RESTful APIs using ASP.NET Core (.NET 6) consumed across 6 Angular TypeScript projects, improving cross-service integration and frontend delivery speed.
- Led solo migration of 5 Angular 4 applications to Angular 13 and contributed to a 6th as part of a team, modernizing the frontend stack and eliminating legacy framework technical debt.
- Investigated critical CPU utilization spikes (20–90%+ on individual APIs) using Azure Application Insights and KQL queries, identified root causes through log analysis, and collaborated with infrastructure engineers on targeted Azure App Service scaling, recovering system stability and unblocking 1,000+ stalled invoice processing records.
- Extended existing Classic Editor CI/CD pipelines and co-built new YAML deployment pipelines with reusable templates in Azure DevOps alongside the DevOps engineer, improving release consistency and reducing deployment errors.
- Identified a documentation gap, introduced Mermaid diagram-based API documentation and Markdown wiki publishing, trained colleagues on Copilot-assisted documentation generation, and automated wiki publishing via a dedicated Git branch pipeline – transforming the team from zero documentation to a self-maintaining knowledge base.
- Mentored junior developers and supervised interns through structured code reviews, enforcing best practices in API design, unit testing, and version control workflows.

CED Tunisia

February 2022 – July 2022

Graduate Intern – Full-Stack and Data Science

Tunis, Tunisia

- Built a Python machine learning model for automated invoice categorization, achieving 90% classification accuracy on the validation dataset.
- Developed ASP.NET Core APIs for invoice storage and retrieval integrated with Azure Blob Storage and Microsoft SQL Server.
- Delivered an Angular 14 TypeScript dashboard with Microsoft Graph API integration for classifying emails and documents, including architecture diagrams and onboarding documentation.

Millenia Engineering

June 2021 – August 2021

Software Engineering Intern – Backend and Data Systems

Bizerte, Tunisia

- Implemented a Node.js telemetry service decoding industrial signals from Modbus analyzers for real-time data processing.
- Designed MongoDB schemas for efficient time-series data storage and retrieval.

PROJECTS

Personal Portfolio Website | .NET 10, React, TypeScript, PostgreSQL, Docker, Azure

April 2026 – May 2026

- Architected and built a production-grade full-stack application from scratch following Clean Architecture principles with Domain, Application, Infrastructure, and Presentation layers.
- Implemented JWT authentication, per-IP rate limiting, Serilog structured logging to a dedicated PostgreSQL log database, and SendGrid transactional email integration.
- Built React TypeScript frontend with custom hooks, context API for state management, and dynamic API integration deployed on Azure Static Web Apps with custom domain and HTTPS.
- Containerized the .NET backend using Docker and deployed to Azure Container Apps with CI/CD automation via GitHub Actions and GitHub Container Registry.
- Configured PostgreSQL with Entity Framework Core code-first migrations for scalable data persistence on Neon serverless PostgreSQL.

CERTIFICATIONS AND ACHIEVEMENTS

Microsoft Certified: Azure Developer Associate (AZ-204)

August 2024

TOEIC: Test of English for International Communication

Score: 975/990 – April 2022

EDUCATION

National School of Computer Science (ENSI)

Manouba, Tunisia

Computer Science Engineering Degree (Master-level equivalent, Bologna Framework) September 2019 – September 2022

LANGUAGES

Arabic: Native

English: Fluent (C1)

French: Fluent (C1)

German: Basic (A2)
