PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience building enterprise-grade .NET backend services and Angular applications. Microsoft Certified Azure Developer (AZ-204) with hands-on experience in microservices patterns, distributed systems, CI/CD pipelines, and cloud-native architectures using .NET 10, Docker, Kubernetes, and Azure.

TECHNICAL SKILLS

Languages & Frameworks: C#, TypeScript, .NET Core/10, ASP.NET Core, Angular, React, Node.js, MassTransit, YARP

Cloud & DevOps: Azure (Functions, App Service, Service Bus), Docker, Kubernetes, Minikube, GitHub Actions, CI/CD, YAML

Data & Architecture: PostgreSQL, SQL Server, MongoDB, RabbitMQ, EF Core, Microservices, Saga Pattern, Transactional Outbox, Clean Architecture

WORK EXPERIENCE

CED Tunisia October 2022 – June 2026

Software Engineer – Full-Stack .NET / Angular

Tunis, Tunisia

- Designed modular RESTful APIs using ASP.NET Core (.NET 6) consumed across 6 Angular TypeScript projects, improving cross-service integration.
- Led the solo migration of 5 legacy Angular 4 applications to Angular 13, eliminating technical debt and modernizing the frontend stack.
- Diagnosed critical CPU spikes (up to 90%) using Azure Application Insights and KQL, collaborating on App Service scaling to unblock 1,000+ stalled invoice records.
- Co-built YAML deployment pipelines in Azure DevOps using templates.
- Identified a critical documentation gap and engineered an automated documentation workflow using GitHub Copilot, Markdown, Mermaid diagrams and Azure DevOps wiki.

CED Tunisia February 2022 – July 2022

Graduate Intern – Full-Stack and Data Science

Tunis, Tunisia

- Built a Python ML model for automated invoice categorization, achieving 90% accuracy on the validation dataset.
- Developed ASP.NET Core APIs for document retrieval integrated with Azure Blob Storage and delivered an Angular 14 dashboard with Microsoft Graph API.

PROJECTS

Distributed Microservices E-commerce System | .NET 10, MassTransit, RabbitMQ, K8s June 2026 – Present

- Architected an event-driven microservices system using the Saga State Machine pattern via MassTransit.
- Implemented Transactional Outbox and Idempotent Inbox patterns with EF Core and RabbitMQ to guarantee reliable async communication.
- Automated CI/CD via GitHub Actions to publish Docker images to GHCR, orchestrating deployments via Minikube and K8s Secrets.

Personal Portfolio Website | .NET 10, React, TypeScript, Azure April 2026 – May 2026

- Built a full-stack Clean Architecture application featuring JWT auth, rate limiting, and Serilog structured logging to PostgreSQL.
- Deployed the React frontend to Azure Static Web Apps and containerized the .NET backend to Azure Container Apps via GitHub Actions.

EDUCATION, CERTIFICATIONS & LANGUAGES

National School of Computer Science (ENSI) – Computer Science Engineering Degree (Master-level equivalent) 2019 – 2022

Microsoft Certified: Azure Developer Associate (AZ-204) August 2024

Languages: Arabic (Native), English (Fluent/C2 - TOEIC 975/990), French (Fluent/C1), German (B1)
